National Allergy Bureau

The pollen count this week is mostly low, with a slight increase on Monday and Wednesday for grass and tree pollen, and a slight decrease on Friday for the same pollen types. The composite pollen count is very low this week, with the highest count being on Monday for grass pollen. The composite mold count is also very low this week, with the highest count being on Monday for outdoor molds. The composite pet dander count is very low this week, with the highest count being on Friday for dog dander.

**Ancestry.com**

The ancestry of the people living in the Sacramento region is diverse, with significant contributions from European, African, and Native American populations. The region has a rich history, with the city of Sacramento founded in 1848 and serving as the capital of California.

**California**

California is the most populous state in the United States and is known for its diverse geography, from the coastal areas to the Sierra Nevada mountains. The state is home to many major cities, including Los Angeles, San Francisco, and Sacramento.

**San Francisco Bay Area**

The San Francisco Bay Area is a critical part of California, with major cities such as San Francisco, Oakland, and San Jose. The area is known for its tech industry, cultural diversity, and beautiful scenery.

**Northern California**

Northern California includes areas such as the redwood forests, the Mendocino coast, and the Sierra Nevada mountains. The region offers a variety of outdoor activities, from hiking and camping to skiing and snowboarding.

**Marine Forecast**

The marine forecast for the San Francisco Bay Area indicates a high pressure system moving in, resulting in clear skies and mild temperatures. Winds will be light, with occasional breezes.

**Water Storage**

The Sierra Nevada snow water equivalent (SWE) is currently at 80.86 ft., which is slightly above the 80.65 ft. recorded in May 2017. This is a significant improvement from previous years, indicating a potential for a better water supply for the upcoming season.

**National Allergy Bureau**

The pollen and mold counts for the Sacramento region are currently very low, with the highest counts being on Monday for grass pollen and outdoor molds. The composite pet dander count is also very low, with the highest count being on Friday for dog dander.
